OPERATING INSTRUCTIONS

Follow the instructions below to operate your PINION® watch. Please ensure you do not try to adjust the date or time in wet or humid conditions and push the crown back into correct position once you have completed your adjustments.

1

Normal position

This watch has a push-down crown and will wind itself automatically when worn. If you haven't worn the watch for a while, it is recommended to wind the watch by turning the crown clockwise for 20-30 times prior to wearing.

2

Quick date adjustment

Gently pull the crown out to position (2) then turn it counter-clockwise to set the date quickly. See warning for date adjustment between 8pm and 2am

3

Time adjustment

Pulling the crown into the position (3) will stop the seconds hand so that time can be set by moving the crown which will adjust the hands. You can also set the date in this position, by forwarding the time between approx. 11:59pm and 12:00am.

Do not quick adjust the date if the time on the watch is set between 8pm and 2am as this can damage your watch movement.

WATCH CARE + SERVICING

Your PINION® watch has been engineered to be highly robust and with the correct care will last for many years. Please ensure that you follow the tips below when caring for your watch.

Cleaning

To clean your watch, use water with mild soap and a soft cloth to clean the case and sapphire crystal.

Water resistance

Ensure the crown is pushed in all the way before any contact with water. Do not pull the crown out to adjust the time or date when the watch is submerged in water or if you are in a very humid environment.

Sea water

If your watch has been in sea water, then afterwards, wash the watch with fresh water.

Shock resistance

The watch and movement has been engineered to be robust, however try and avoid any heavy shocks to the watch.

Magnetic fields

Avoid placing the watch near items which may contain magnetic fields (such as TVs and loudspeakers) as this may cause the watch to run very fast and require it to be demagnetized.

SERVICING

It is recommended you service your PINION® watch every 3-5 years to ensure that essential maintenance can be carried out and that any worn parts such as gaskets (To retain water resistance) can be replaced.

Contact: service@pinionwatches.com or call us on +44 (0) 3333 010130 to arrange servicing for your watch.

TECHNICAL SPECIFICATIONS

Movement

AXIS STEEL PROTOTYPE

TWO YEAR WARRANTY

Your PINION® watch is warranted by Pinion Watch Company Ltd for a period of twenty four (24) months from the date of purchase.

The warranty covers material and manufacturing defects which may exist at the time of purchase and during the warranty period, you have the right to have any defect repaired free of charge.

The warranty does not cover:

- Normal wear and tear and aging (e.g. any colour change, or scratches made to any parts of the watch).
- Any damage from accidents, abnormal use or incorrect use of the watch. This includes damage to the movement from incorrect adjustment of the date (See: Operating instructions).
- The Pinion watch being opened, altered, repaired by a non-authorized person.

For all enquiries regarding your watch then please email us at: service@pinionwatches.com or call us on +44 (0) 3333 010130 to arrange for your watch to be inspected.

WARRANTY DETAILS

To receive full benefits of our two year warranty, please register your watch serial number online at: <http://www.pinionwatches.com/register>
