Models: Pure, Pure-Pro

PINIONWATCHES.COM

Version 2.0 - November 2017

Instructions

Follow the instructions below to operate your watch. Please ensure you do not try to set the time in wet or humid conditions and you push the crown back into correct position once you have completed your adjustments.

① **Winding the watch**

This watch has a hand-wound mechanical movement that requires you to wind it on a regular basis. To wind the watch, ensure the crown is fully pushed in and turn the crown clockwise until it stops.

When fully wound, the watch will provide power for approx. 50 Hours.

② **Setting the time**

Pull the crown out and turn it clockwise until you have the desired time set. When finished, push the crown back to the original position at (1).

Watch care

Your watch has been engineered to be highly robust and with the correct care will last for many years.

Please ensure that you follow the tips below when caring for your watch.

Cleaning

To clean your watch case and sapphire crystal use water with mild soap and a soft cloth.

Water resistance

Ensure the crown is pushed in all the way before any contact with water. Do not pull the crown out to adjust the time or date when the watch is submerged in water or if you are in a very humid environment.

Sea water

If your watch has been in sea water, then afterwards, wash the watch with fresh water.

Shock resistance

The watch and movement has been engineered to be robust, however try and avoid any heavy shocks to the watch.

Magnetic fields

Avoid placing the watch near items which may contain magnetic fields (such as loudspeakers) as this may cause the watch to run incorrectly and require it to be demagnetized.

Two year warranty

Your watch is warranted by Pinion Watch Company Ltd for a period of twenty four (24) months from the date of purchase.

The warranty covers material and manufacturing defects which may exist at the time of purchase, and during the warranty period, you have the right to have any defect repaired free of charge.

The warranty does not cover:

- Normal wear and tear and aging (e.g. any colour change, or scratches made to any parts of the watch).
- Any damage from accidents, abnormal use or incorrect use of the watch. This includes damage to the movement.
- The watch being opened, altered or repaired by a non-authorised person.

For all enquires regarding your watch then please email Pinion at: hello@pinionwatches.com

Or call on +44 (0)3333 010130 to arrange for your watch to be inspected.
